Feed Products 84 2026/2027

High-quality Feed and Feed Stations
for Wild Birds, Hedgehogs and Squirrels

Feeding wild birds offers us humans a unique opportunity to develop close contact with our feathered friends and to observe them at very close quarters. All Bird Feeders produced in-house or sold by Schwegler follow the basic policy that thanks to the principle of silo stockage, the birds cannot defecate on their own feed. Dangerous salmonellosis (Paratyphus) can therefore be prevented. This would otherwise inevitably lead to the death of your fosterlings. Each time you top-up the feed dispenser, always check it and the surroundings for soiling. Clean the feeding area with hot water if necessary. Apart from wild bird feed, we also offer species-compatible feed for hedgehogs and squirrels.

At Schwegler you can purchase wild bird feed the whole year round. We make sure that we only use high-quality ingredients, without artificially bulking the feed with worthless fillers. Like all our feed, the suet balls are also checked for ragweed/ragwort seeds. Especially where our Suet Balls and Suet Cakes are concerned, we take particular care to ensure that no nets are used.

The background is easy to understand: birds can easily get entangled in them, because the empty nets are often left in nature, where they not only do not belong but also constitute a real hazard for birds as well as mammals (e. g. hedgehogs). We have reusable feeders for you to purchase for proper feeding.

» "RING-PULL™ CLICK" BIRD FEEDERS Metal

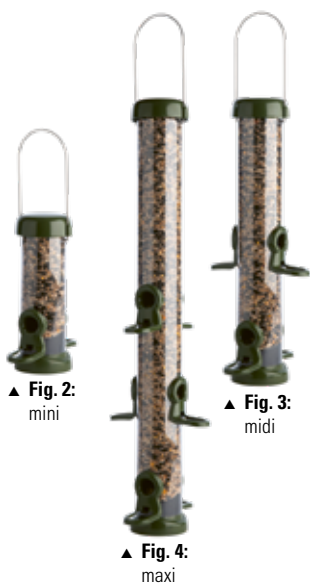

High-quality, tubular Bird Feeders made of metal with polycarbonate tubes. The latest model of the popular Ring-Pull™ series has robust perches, which can be easily removed by the click principle. The floor and all the individual components can be dismantled without tools, cleaned and re-assembled just as easy. Ideally suited for achieving permanent hygiene in the feeding area with minimum effort.

Variants: Available in three sizes and two colours. Upon request with optional feeding dish (see page W6).

Material: Stainless metal parts (green- or silver-coated) with UV-resistant polycarbonate tubes.

Suitable food: Sunflower seeds and mixed seeds for bird-feeder tubes. Supplied without feed.

For optional » **accessories**, see page W6.

» "BIG EASY™" BIRD FEEDER Metal

High-quality, tubular Bird feeder made of aluminium with polycarbonate tubes. Easy and fast cleaning thanks to patented design. All the individual components can be dismantled without tools, clean and re-assembly is just as easy – it's child's play. Ideally suited for achieving permanent hygiene in the feeding area with minimum effort. An optional Feed Plate you will find on page W6.

Suitable feed: Sunflower seeds and feed mixes for feeder tubes. Supplied without feed.

» **Big Easy™** 6 Feeding Ports

Dimensions: ø 8 cm. **Height:** 50 cm. **Volume:** 2.2 l. **Order No.** 00 804/6

Suitable accessories, e.g.
» **Big Easy™ Feed Plate**
can be found on page W6.

» "FLO™ FESTIVAL" BIRD FEEDER Metal

flo™ festival is a super-size feeder. The largest model holds an enormous 5.2 litres of seeds or mixes. The extra-wide tubes and the individually attached seed ports ensure that the feed flows effortlessly and without annoying blockages. The openings are located in the bottom half, thereby creating an effective seed reserve in the top half of the tube, which ensures that the birds always have access to feed through the bottom ports without the tube having to be regularly refilled. All the individual components can be dismantled without tools, clean and reassembled just as easily.

Suitable feed: Sunflower seeds and feed mixes for feeder tubes. Supplied without feed.

» **„Flo™ Festival maxi“ Tubular Bird Feeder** 9 Feeding Ports (Figure 1)

Dimensions: ø 8.5 cm. **Height:** 77 cm (with bracket). **Contents:** 3.4 l. **Order No.** 00 805/3

» **„Flo™ Festival ultra“ Tubular Bird Feeder** 12 Feeding Ports (Figure 2)

Dimensions: ø 8.5 cm. **Height:** 102 cm (with bracket). **Contents:** 5.2 l. **Order No.** 00 511/3

» ACCESSORIES FOR BIRD FEEDERS

» Large Seed (big) Scoop for all feeders

Scoop with funnel for removing feed mixes from larger containers, e.g. sacks or storage containers. The wide end is used for scooping. The narrow end is then used as a funnel for very fast and easy filling of a Tubular Bird Feeder, without spilling valuable feed.

Material: Transparent, weatherproof plastic. **Capacity:** approx. 1.8 l. **Order No. 00 512/0**

» Seed Scoop (small) for all feeders

The feed can be scooped up with the large opening when the slide is closed; open the slide to easily add feed to Tubular Bird Feeders or Feed Silos. The clever design makes it easy to operate with one hand.

Material: Plastic, green. **Capacity:** approx. 0.9 l. **Order No. 00 513/7**

» Feed Plate (small) for feeders

This Feed Plate can be used nearly on all feeders. It is easily attached to the base. Please ensure the Seed Tray is clean each time you refill the feeder. Wash with hot water if necessary.

Material: Transparent plastic. **Exception:** Not for "Big Easy".

Dimensions: $\varnothing$ 21 cm.

Order No. 00 806/0

» Feed Plate (large) for feeders

This Feed Dish can be used on all feeders (except for the "Big Easy™" Feeder). A plastic screw is supplied to attach it to the bottom of the tube, preventing the food from falling onto the ground. Please keep clean and wash out with hot water from time to time.

Material: Transparent plastic. **Exception:** Not for "Big Easy™". **Dimensions:** $\varnothing$ 27 cm.

Order No. 00 588/5

» Feed Plate (large) "Big Easy"

Feed Plate especially for the Big Easy™ feeder. The plate prevents the feed from falling to the ground. Please ensure cleanliness and clean occasionally with hot water.

Material: Transparent plastic. **Dimensions:** $\varnothing$ 28 cm.

Order No. 00 803/9

» Garden Pole for bird feeders

This 3-piece pole enables the freestanding installation of Tubular Bird Feeds of the type Birdlover™, Ring-Pull™, The One™, Big Easy™ and the large Feed Lamp. The pole is fitted together and its tip is pushed into the ground. The enclosed screw adapter can be used to screw the Tubular Feeders onto the pole. With the exception of the Big Easy™ Tubular Bird Feeder, it is simply fitted on without a screw adapter. 3 year guarantee.

Material: Powder-coated steel. **Height:** 1.73 m. **Colour:** green.

Order-No. 00 807/7

» Spiral Hook

Do you not have a suitable tree for hanging Tubular Bird Feeders, etc.? No problem. With the spiral hook you can position Tubular Bird Feeders on any bars, railings etc. that are as interesting as possible for Birds. The Spiral Hook can be attached to any bar with approx. 2 cm diameter.

Material: Powder coated spring steel. **Colour:** green.

Dimensions: 40 cm. **Weight:** 0.16 kg.

Includes: 1 x hook. (Supplied without Birdfeeder, Garden Pole, etc.).

Order No. 00 841/1

» Extension-Hook for bird feeders

These plastic hooks are ideal for hanging up tit food balls and similar items directly underneath the feeder tube. The bases of the "Birdlover™", "TheOne™" and "Ring-Pull™" Tubular Feeders are provided with a threaded connection into which these hooks can be screwed. This makes your feeder tubes even more effective. Also functions together with a Feed Plate.

Order No. 00 859/6 (SU = 2)

» FEEDER LAMPS Plastic

These Feed Lamps are a magnet for smaller Birds such as Tits, Wrens, Sparrows and Finches. They are not suitable for larger species such as Starlings and Pigeons. Made of durable plastic, for hanging.

» **Small Feed Lamp** The rainproof cover of the feed body can be removed for refilling, while the bottom can be twisted off in no time for cleaning. Supplied without feed.

Colour: black. **Contents:** 0.9 litre. **Order No.** 00 801/5

» **Large Feed Lamp** Turn the roof to unlock and remove it. The Feed Lamp is then very easy to clean and fill. Supplied without feed.

Colour: green. **Contents:** 1.3 litre. **Order No.** 00 800/8

Which bird eats which feed? In general, there are ...

Grain eaters e.g. **Tit species** (Blue, Marsh, Coal, Great Tits), **Sparrows** (House Sparrows, Tree Sparrows), **Finch Species** (Chaffinches, Greenfinches, Siskins, Goldfinches, Hawfinches), **Bullfinches**. These birds feed on all types of seeds, whose husks and shells they can break open with their beaks – e.g. sunflower seeds, hempseeds, buckwheat, however, rolled oats too. Feed products marked with a **sunflower** are suitable.

Soft-feed eaters e.g. **Blackbirds, Robins, Thrushes, Starlings, Wrens, Hedge Sparrows, Nuthatches, Treecreepers, Woodpeckers** feed mainly on berries, fruit, rains, rolled oats, ground or shredded unsalted nuts, insects, molluscs which, with their rather pointed, delicate beaks, they are easily able to eat. All feed products marked with a **strawberry** are suitable.

» FEED STATION FOR PEANUT BUTTER Plastic

» Flutter-Butter Feed Station for jars of peanut butter and Flutter-Butter-Pods

With an innovative design and clean handling, the Flutter-Butter Feed Station offers a new option for feeding garden birds. Simply twist a jar of Flutter-Butter Fruity or Flutter-Butter Buggy into the bracket, ready. For 330 g jar of Flutter-Butter.

Width: 15 cm. **Height:** 12 cm.

Includes: Feed station, does not include jars of peanut butter.

Order No. 00 544/1

Note: Fats have a very low melting point, therefore it is best to use peanut butter in the winter only, or not on hot days.

» PEANUT BUTTER Flutter-Butter for feeding in winter

» Flutter-Butter Peanut Butter in a jar

Flutter-Butter Peanut Butter in a jar for the Flutter-Butter Feed Station is available in two flavours. "Fruity with fruits" and "Buggy with mealworms". Peanut Butter for human consumption is salty and unsuitable for birds. The special Flutter-Butter Peanut Butter contains no more than 2 mg/100 g salt and is a popular, rich food for Garden Birds. Clean storage in screw-top jar, easy to attach to the Flutter-Butter Feed Station.

Order No. 00 545/8 Fruity Flutter-Butter 330 g

Order No. 00 546/5 Buggy Flutter-Butter 330 g

▲ compatible with Feed Station

▲ Suet Cake Feeder see Page W11

» SUET CAKES for winter feeding

The food cakes are invaluable because they have a high concentration of ingredients that help birds to conserve energy. This mixture of fat and food is one of the best on the market in terms of nutritional value. The cakes are packed individually, which means that they store and keep better. Each cake is placed in a separate wire basket (see page W11), from which the Birds can serve themselves. There are four different recipes, so at least one of them is bound to appeal to the inhabitants of your garden.

» **High Energy Cake, vegetarian** Quantity: 340 g.

Order No. 00 555/7

Ingredients: vegetable fats (rapeseed oil), peanut flour, wheat and corn flour, broken peanuts, black sunflower seeds, millet. On a vegetarian basis.

» **Peanut Cake with animal fats (beef tallow)** Quantity: 340 g.

Order No. 00 559/5

Ingredients: animal fats (beef tallow), peanut flour, corn flour, peanut meal, millet.

» **Insect Cake with animal fats (beef tallow)** Quantity: 340 g.

Order No. 00 557/1

Ingredients: animal fats (beef tallow), peanut flour, wheat and corn flour, millet, broken peanuts, roasted breadcrumbs and dried insects.

» **Mixed Seed Cake with animal fats (beef tallow)** Quantity: 340 g.

Order No. 00 554/0

Ingredients: Raisins, millet, crushed cereals and peanuts.

Fats have a very low melting point, therefore it is best to use cakes in the winter only, or not on hot days.

» I LOVE ROBINS® for summer and winter feeding

Special feed with honey for an extra portion of proteins and energy. Perfect for year-round feeding. Suitable as bird seed. I love Robins® contains an aromatic protein and energy mix with fruits, shrimps, insects and honey, which Robins find irresistible. However, not only they love the feed, but also other soft feed eaters, such as Blackbirds, Thrushes, Starlings, Wrens, Hedge Sparrows, Nuthatches, etc. prefer fruit and insects in their food. I love Robins® is not merely bird feed for wild birds, but has been especially developed for soft food eaters. Feed them on the ground, as ground feed or in special feed dishes suitable for this feed. Do not fill feed tubes or bird feeders with this product, as the special feed could otherwise clump together.

Quantity 500 g. Order No. 00563/2

» Window Feed Dish

This small feed plate enables a perfect observation feeding spot at the window. Simply attach to the window using the suckers. Optimum attachment to the bottom edge of the window pane, for example, so that Blackbirds can sit on the window sill and peck their food out of the dish. In case of large numbers of pigeons the dish can be positioned higher up the window, to avoid birds sitting on the window sill. Optionally, the plate can also be fitted with the following weatherproof hood. Supplied without feed. Suitable for the special I love Robins® feed.

Material: KSP transparent.

Dimensions: W 12 cm x H 3.5 cm x D 11 cm.

Order No. 00 548/9

» Hood for Window Feed Dish

This hood can be attached optionally above the window feed dish, to ensure improved weather protection. The suckers are used to attach the hood to the window pane approx. 10 cm above the feed dish. Supplied without feed.

Material: KSP transparent.

Dimensions: W 18 cm x H 4 cm x D 14 cm.

Order No. 00549/6

Suitable Feeder Stations for Suet Balls
can be found on page W10 + W11

» SUET BALLS

» Suet Balls for winter feeding (higher fat content)

High-quality mixture of rolled oats and wheat flakes, sunflower seeds, oils and fats, nuts, seeds, peanuts and minerals. Delivery without plastic net to avoid injuries.

Ingredients: Grain flakes, sunflower hearts, peanuts, minerals. Ideal for such garden birds as Coal, Blue, Marsh, Great and Crested Tits, Nuthatches, Chaffinches, Greenfinches, Bramblings, Bullfinches, Siskins, etc.

Installation: If possible hang under overhanging eaves, protected from rain and sunlight.

» **6 pieces** **Contents:** 6 pieces each 100 g on tray **Order No. 00 850/3**

» **100 pieces** **Contents:** 100 pieces each 100 g loose in carton **Order No. 00 866/4**

» Suet Balls for summer and winter feeding

Suet Balls for summer and winter feeding. This "allrounder" allows feeding all-year-round. Delivery without plastic net to avoid injuries.

Ingredients: Grain flakes, fat, seeds, minerals. Ideal for such garden birds as Coal, Blue, Marsh, Great and Crested Tits, Nuthatches, Chaffinches, Greenfinches, Bramblings, Bullfinches, Siskins, etc.

Installation: If possible hang under overhanging eaves, protected from rain and sunlight.

» **6 pieces** **Contents:** 6 pieces each 100 g on tray **Order No. 00 853/4**

» **100 pieces** **Contents:** 100 pieces each 100 g loose in carton **Order No. 00 867/1**

» Giant Suet Balls for summer and winter feeding

The original Schwegler giant food balls, suitable as a winter food for wild birds. Their larger volume means that they provide a source of food for much longer than standard food balls. They will only fit in the baskets shown on page W11 (Order No. 00 849/7 and 00 579/3).

Installation: If possible hang under overhanging eaves and sunlight, protected from rain.

Ingredients: Sunflower seeds, cereal (flakes), oils and fats, nuts, peanuts, minerals.

Content: 500 g single ball foil-wrapped. Delivery without plastic net to avoid injuries.

Order No. 00 845/9

» Suet Balls with insect fat for summer and winter feeding

Environmentally aware and care use of resources by production using the fat of insect larvae (e.g. *Hermetia illucens*). This corresponds to the natural diet of birds.

Installation: Where possible, hang up protected from the rain and sunlight, e.g. under eaves.

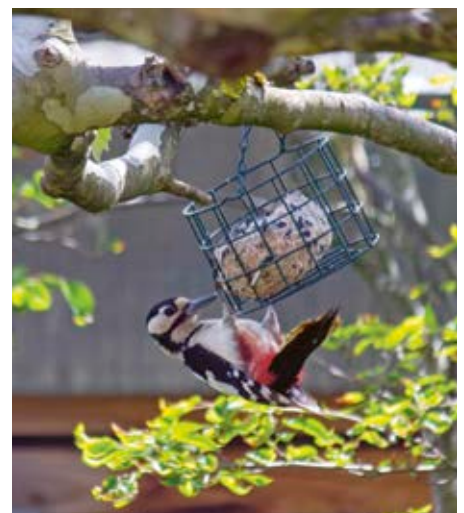

Composition: Grain, oil, grease, seeds, nuts, berries, minerals.

Contents: 45 pieces without net harmful to birds (4 kg).

Order No. 00 848/0

Better for birds and the environment!

Better to use without plastic net!

» FEED STATIONS FOR SUET BALLS Metal

» Suet Ball Feeder

Suet Balls are suitable for summer and all-year feeding (see page W9). The new model is available in two sizes, for up to three or six suet balls with a maximum diameter of around 6 cm. We deliberately recommend the use of suet balls without plastic netting, as the netting poses a large risk of injury for birds and wild animals. Thanks to the pull-off lid, the Tubular Bird Feeders can be very easily refilled and cleaned. Hang from the integrated fixing bracket. Supplied without suet balls.

Available in two sizes!

Colour: green. **Volume:** for 3 Suet Balls. **Dim.:** ø 7.3 cm. **Height:** 33 cm (with hanger).

Order No. 00 858/9

Colour: green. **Volume:** for 6 Suet Balls. **Dim.:** ø 7.3 cm. **Height:** 51 cm (with hanger).

Order No. 00 860/2

» Feed Ring for Suet Balls

For 10 – 11 Suet Balls without net (up to max. ø 65 mm). The Feed Ring can be used to feed wild birds all year round. The ring is protected against corrosion and there is no risk of injury for birds. Suitable Suet Balls can be found on page W9. Supplied without suet balls.

Dimensions: W 25 x H 25 x D 8 cm.

Material: Metal, painted black.

Order No. 00 846/6

» Mesh Suet Ball Feeder

For max. 3 Suet Balls without netting. The Mesh Suet Ball Feeder is easy to fill and is practical for wild birds to perch on. We recommend this type of suet ball feeder without netting, as there is no risk of the birds being injured on the netting and no packaging waste is produced. Suitable Suet Balls can be found on page W9. Supplied without suet balls.

Dimensions: ø 7 x H 18.5 cm

Material: Metal, painted black.

Order No. 00 857/2

» Suet Spring for Suet Balls

The Schwegler Suet Spring is easy to refill by simply extending it in the middle. Once the feeder has been filled, it returns to its original shape. Two suet balls or fruit can easily be fitted inside (suet balls not supplied). Please see page W9 for Suet Balls.

Material: Weather-resistant steel with forest-green coating.

Order No. 00 847/3

» FEED STATIONS FOR SUET BALLS AND CAKES Metal

» Premium Feed Basket for Suet Balls or Cakes

For six Suet Balls (up to max. $\varnothing$ 65 mm) or one Suet Cake without netting. Our new, durable feed dispenser manages to combine practical design with an attractive appearance. The robust steel cage holds up to one Suet Cake or six Suet Balls, so that it does not need regular refilling. Thanks to the easy to open cover, topping up stocks is child's play. Supplied without feed, suitable Suet Balls and Cakes can be found on page W8 and W9.

Dimensions: W 15 x H 21 x D 8.5 cm.

Material: Metal, green painted cover.

Order No. 00 571/7

» Suet Cake Feeder

Bird Food Cakes are a very popular birdfood, valued for their high energy content and appreciated by many species including Great Spotted Woodpeckers, Nuthatches, Tits and Starlings. Our Cakes offer outstanding value, quality and choice. Available in several flavours, they are specially formulated to appeal to a broad spectrum of species. Each Suet Cake is shrink-wrapped. To use, the cakes are removed from the packaging and placed in the feeder. Alternatively, remove the lid and insert with the plastic tray. Cakes are available in different flavours, please see page W8 for details.

Dimensions: W 13 x H 13 x D 5 cm (without hanger).

Suitable for 1 Suet Cake **Order No. 00 574/8**

» Feeding Basket for Giant Suet Balls

The feed basket is an ideal and environmentally friendly way of hanging up Schwegler large suet balls (Order No. 00 845/9, page W9). It is re-usable, thereby saving on packaging. Suet ball not supplied.

Material: Weather resistant green coated steel, with hanger (chain).

Dimensions: $\varnothing$ 10.5 cm.

Height: 8 cm.

Order No. 00 849/7

Photo: © David Tipling

» Mesh Giant Suet Ball Feeder

For 1 Giant Suet Ball without netting (Order No. 00 845/9, page W9).

When installing, please pull the chain through the mesh (see figure on the right).

This secures the fastener and cannot be opened by the weight of the suet ball and the perched birds. Suet ball not supplied.

Dimensions: $\varnothing$ 11 x H 11 cm

Material: Metal, painted black.

Order No. 00 579/3

Our large Schwegler feeders (Silos) can be used over longer periods without requiring re-filling. This can be an advantage, for example, during long absences or if the feeder is proving particularly popular, because regular feeding places should always offer a consistent supply of food, especially during periods of frost and snow. In addition this minimizes disputes between the animals, because they are able to feed at various places instead of all having to obtain their food within a relatively small space. The silo structure prevents bird droppings collecting in the food, which can cause the spread of such dangerous pathogens as salmonella (Paratyphus) and lead to the death of our feathered friends.

» GROUND FEEDER FOR SOFT FOODS

This has been specially developed for ground feeding species such as Robins, Yellowhammers, Dunnocks, Blackbirds, etc., which prefer not to use hanging feeders. They are referred to as soft food eaters.

The main features of the soft food silo are its excellent stability and ease of use. It is a simple matter to clean and re-fill it, by removing the cover.

Siting: Sheltered places such as in hedges and under trees and bushes.

Suitable soft food: For the species referred to above it is advisable to use special soft food such as dried berries, raisins and currants, oats, fruit cut into small pieces and dried meat. Sunflower seeds are less suitable. Alternatively you can use the special fat-rich soft food that has been specially developed for the ground feeder, shown on page W15 – Order No. 00 258/7.

Material: Schwegler wood-concrete. **Dimensions:** W 32 x H 31 x D 32 cm.

Volume: 9 litres (supplied without food). **Colour:** olive-green **Weight:** approx. 12 kg.

Order No. 00 237/2

» BIRDFEEDER No. 8

Round food silo made of soft thermoplastic, with very large capacity. Ideal for professional use. Placing the feeders in a circle and at the same level causes the least disturbance between the animals, which are much less likely to try and drive each other away from the feeding site. They are re-filled by simply removing the loop of galvanized wire and taking off the top. This makes cleaning a very quick process. A tried and tested feeder that has been part of our range for several decades. The base is weighted to ensure that it hangs securely without any excessive movement even when empty or half empty. We recommend that it should only be filled with a sunflower seed mixture. Fat-rich food or peanuts are not suitable and special feeders are available for this purpose.

Examples of suitable food can be found on page W14.

Items supplied: feeder silo, incl. metal mounting loop. 7 feeding ports.

Material: plastic, wood-concrete.

Colour: white plastic container with black roof.

Dimensions: $\varnothing$ 36 cm x H 32 cm plus hanger.

Volume: 13 litres (supplied without food).

Weight: approx. 3.5 kg.

Order No. 00 235/8

» BIRDFEEDER No. 9

Round feeder silo made of plastic. Placing the feeders in a circle and at the same level causes the least interference among the feeding animals. The feeders are re-filled by simply removing the loop of galvanized wire and taking off the top. This makes cleaning a very quick process. A tried and tested feeder that has been part of our range for several decades. The base is weighted to ensure that it hangs securely without any excessive movement even when empty or half empty. We recommend that it should only be filled with a sunflower seed mixture. Fat-rich food or peanuts are not suitable and special feeders are available for this purpose. Examples of suitable food can be found on page W14.

Items supplied: feeder silo, incl. metal mounting loop.

7 feeding ports.

Material: plastic, wood-concrete.

Colour: white/transparent plastic container with black roof and rain cover.

Dimensions: $\varnothing$ 29 cm x H 32 cm plus hanger.

Volume: 9 litres (supplied without food).

Weight: approx. 2 kg.

Order No. 00 236/5

» HEDGEHOG FOOD

Wholesome complete feed for hedgehogs especially with plenty of protein from meat, insects, nuts, eggs and grain. The feed has been largely adapted to hedgehogs' natural eating habits. Ideally suitable for supporting free living hedgehogs in the summer or as food for hibernation.

Quantity: 750 g

Order No. 00 395/9

**IMPORTANT INFORMATION!**

Please never feed hedgehogs anything containing salt, spices or sugar, i.e. avoid any leftovers from the table. No milk! However, hedgehogs will be grateful for some water in a shallow dish. Hedgehogs in the wild which weigh less than 500 g at the beginning of November are unlikely to survive hibernation. It is advisable to help them, and assistance is available from the many hedgehog rescue centres.

By the way ... many veterinary practices treat wild animals (including hedgehogs) free of charge, but you should preferably enquire beforehand.

» AUTOMATIC FEEDER FOR SQUIRRELS with Feed Mix

This Feed Station is suitable for providing squirrels in the garden with feed all-year round. The feeder has been tried and tested in practice. The automatic feeder is typically fixed on a tree trunk using the fixing hole (e.g. with our Schwegler Aluminium Nail). The feed is topped up through the large lid flap. Feed mixes with whole nuts are therefore also not a problem, the feed is easily visible to the animal through the transparent plastic panel. We recommend using special Feed Mixes for squirrels (see below), we advise against normal bird feed. The squirrel climbs onto the non-slip platform of the Automatic Feeder and removes the feed provided by lifting the cover. The cover automatically returns to its initial position. The feed is protected against moisture and other animal species cannot reach it, or only with difficulty.

Material: high-quality, waterproof bonded laminated silver birch wood with dark-brown coating for outdoor use.

Dimensions: approx. H 24.5 x W 16 x D 23 cm.

Weight: Automatic Feeder 830 g.

Includes: Automatic Feeder, Aluminium Nail, 500 g Schwegler Squirrel Feed. The Feed Mix illustrated below is suitable for topping up the Feeder.

Bestell-Nr. 00 715/5

▲ easy to fill and to clean

» FEED MIX FOR SQUIRRELS

**All-Year Feed »Squirrel Feed**

Recommended and compiled in cooperation with 'Eichhörnchenhilfe Stuttgart'.

Ingredients: Hazelnuts with shell, walnuts with shell, large striped sunflower seeds, hulled sunflower seeds, hazelnuts, walnut halves. Suitable for the Schwegler Automatic Feeder for squirrels.

Quantity: 500 g in a plastic bag.

Order No. 00 716/2

Which bird eats which feed? In general, there are ...

Grain eaters e.g. **Tit species** (Blue, Marsh, Coal, Great Tits), **Sparrows** (House Sparrows, Tree Sparrows), **Finch Species** (Chaffinches, Greenfinches, Siskins, Goldfinches, Hawfinches),

Bullfinches. These birds feed on all types of seeds, whose husks and shells they can break open with their beaks – e.g. sunflower seeds, hempseeds, buckwheat, however, rolled oats too. Feed products marked with a **sunflower** are suitable.

Soft-feed eaters e.g. **Blackbirds, Robins, Thrushes, Starlings, Wrens, Hedge Sparrows, Nuthatches, Treecreepers, Woodpeckers** feed mainly on berries, fruit, raisins, rolled oats, ground or shredded unsalted nuts, insects, molluscs which, with their rather pointed, delicate beaks, they are easily able to eat. All feed products marked with a **strawberry** are suitable.

» SEEDS AND SEED MIXES FOR TUBULAR BIRD FEEDERS

All-Year Feed » **Special Mix** – seed blend

A carefully balanced blend, including black and small striped sunflower seeds, sunflower hearts, peanut granules, and canary seeds. The Special Mix is the ideal standard food for use throughout the year. Suitable for all Schwegler feeder tubes and feeder silos.

Quantity: 4 kg in a paper bag.

Order No. 00 575/5

All-Year Feed » **Premium Mix** – seed blend

Sunflower seeds containing oil, energy-rich peanuts, hemp seeds (high in unsaturated fatty acids), genuine light and highly nutritious oats, raisins. Valuable minerals for building bones and forming eggshells. Suitable for all Schwegler feeder tubes and feeder silos.

Quantity: 5 kg in a bucket.

Order No. 00 581/6

All-Year Feed » **Shell-free Feed Mix**

Is eaten without any residues, no shells left on the ground, solely made of top quality, natural raw materials.

Ingredients: Sunflower seeds, peanuts, canary seeds, wheat flakes, forage oats, hemp seeds, salad oil, sultanas.

Suitable for all Schwegler feeder tubes and feeder silos.

Quantity: 6 kg in a bucket.

Order No. 00 577/9

All-Year Feed » **Black Sunflower Seeds**

This seed food consists entirely of black sunflower seeds, which are very popular on account of their high fat content. They do not block the feeder tubes and are very popular with birds.

Outstanding quality! Supplied in 12.5 kg sacks in practical packets which are easy to handle.

Suitable for all Schwegler feeder tubes and feeder silos.

Quantity: 12.5 kg in a paper bag.

Order No. 00 580/9

» FEED FOR SPECIAL FEEDERS

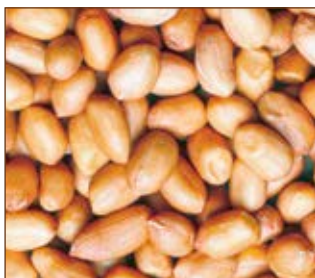

All-Year Feed » Niger Seed for Finches

The high fat content of the wild Bird grains make them particularly popular with finches, especially greenfinches, goldfinches and tits.

IMPORTANT: Only suitable for use with the special feeding tube (Order No. 00 561/8, page W5).

Quantity: 2 kg in a paper bag.

Order No. 00 565/6

All-Year Feed » Premium Peanuts

These large peanuts are rich in vital nutrients and oils. They are the preferred food of Nuthatches and Woodpeckers as well as Tits. For use in all Schwegler mesh-style Peanut Feeders (page W3 and W5).

Quantity: 4 kg in a paper bag.

Order No. 00 576/2

All-Year Feed » Premium Soft Food for ground feeding

Special mixture for the Grond Feeder on page W12 (Order No. 237/2). Genuine and highly nutritious light oats, tasty raisins and high energy peanuts, valuable minerals for building bones and forming eggshells. A high portion of edible fat encloses the mixture – this makes it nonfreezing and protects birds' stomachs.

Quantity: 5 kg in a bucket.

Order No. 00 258/7
